# لیست مقالات پذیرفته شده در بخش پوستر (Poster)

| ردیف | Absract id | عنوان | ارائه دهنده | |
|---|---|---|---|---|
| ۱ | ۳۱ | Title: Intelligent Decision-Making in Acute Repair Surgery: The Role of Artificial Intelligence in Robotic Surgery | آنا اسداله پور | **Anna Asadollahpoor** |
| ۲ | ۸۰ | Artificial intelligence in acute and reconstructive surgeries for burn patients | مجتبی قربانی | **Mojtaba Ghorbani** |
| ۳ | ۱۵۳ | The Effectiveness of Novel Wound Cooling Techniques in Preventing Secondary Burn Complications: A Systematic Review and Meta-Analysis | محیا عظیمی | **Mahya Azimi** |
| ٤ | ۱۰ | Skin graft follow-up results in diabetic and non-diabetic patients with second-degree burns | محمد رضا شهرابی | **Mohammadreza Shahrabi** |
| ٥ | ۲۷ | Advances in Acute and Reconstructive Burn Surgery: Current Practices, Emerging Techniques, and Future Directions | فریاد احمد زاده | **Faryad Ahmadzadeh** |
| ٦ | ۱۸۷ | Comparison of the clinical course of diabetic and non-diabetic patients with acute burns admitted to Shahid Motahari Burn Hospital: A retrospective study | فاطمه خدایی | **Fatemeh Khodaei** |
| ۷ | ۱۸۸ | Evaluation of xenograft decellularization methods for use in skin tissue engineering for the purpose of burn treatment | آتیه انوشه | **Atiyeh Anousheh** |
| ۸ | ۱٦۱ | Extraction and characterization of hyaluronic acid from human umbilical cord and fabrication of skin scaffold from hyaluronic acid/gelatin/alginate by a biological ۳D | سیده سارا هاشمی | **Seyad Sara Hashemi** |

| | | | | |
|---|---|---|---|---|
| | | printer | | |
| ۹ | ۱۱۷ | Multipurpose hydrogel containing exosome and gentamicin to accelerate skin tissue regeneration | لیلا رضا خانی | **Leila Rezakhani** |
| ۱۰ | ۱۱٦ | Biological ۳D Scaffold Enriched with Vitamin A: A Promising Platform for Skin Tissue Engineering | لیلا رضا خانی | **Leila Rezakhani** |
| ۱۱ | ۹ | Decellularized Human Amniotic Membrane: From Animal Models to Clinical Trials | نجمه کمالی | **Najmeh Kamali** |
| ۱۲ | ۱۲۸ | Incorporation of Polymeric Composite with drug-loaded microparticle as a progressive step to inhibit bacterial contamination in burn injury | مریم تمیمی | **Maryam Tamimi** |
| ۱۳ | ۱۵۱ | AI-Optimized Hydrogels for Advanced Burn Wound Care | سیده سارا قادری | **Seyedeh Sarah Qaderi** |
| ۱٤ | ۱۱٤ | Modern Wound Dressings and Tissue Engineering in Burn Management: A Review of Materials and Clinical Efficacy | علیرضا صالحی | **Alireza Salehi** |
| ۱۵ | ۱۸٤ | Nanomedicine in Wound Healing: Emerging Strategies and Future Prospects | علیرضا رفعتی | **Alireza Rafati** |
| ۱٦ | ۱۸۰ | “Novel Approaches in Burn Wound Healing: The Central Role of Mesenchymal Stem Cells and Paracrine Mechanisms” | سید جواد پور افضلی فیروزآبادی | **SeyedJavad Purafzalifiruzabadi** |
| ۱۷ | ۱۲۷ | Epidermolysis bullosa (EB) and Tissue enginering | | **Shirin Toosi** |

| | | | | |
|---|---|---|---|---|
| | | | شیرین طوسی | |
| ۱۸ | ۱۷۹ | A Biocompatible Hydrogel Scaffold with Yarrow Extract and Curcumin Nanoparticles as a Novel Wound Dressing | علیرضا رفعتی | **Alireza Rafati** |
| ۱۹ | ۱٤۳ | Artificial Intelligence in Tissue Engineering and Burn Wound Management: A Review | پرستو تلیکانی | **Parastoo Telikani** |
| ۲۰ | ٤٥ | The effect of platelet rich plasma dressing on healing if burn ulcers | محمد رضا افشار | **Mohammadreza Afshar** |
| ۲۱ | ۷ | The creation, physical and biological characteristics, and in vivo tests of a novel therapeutic hydrogel of amniotic membrane extract/oxidase carboxymethyl cellulose in wound healing | سعیده حاتمی | **سعیده حاتمی** |
| ۲۲ | ۱۳۸ | Evaluation of Efflux Pump Activity and Prevalence of MexAB and oprD Genes in Multidrug-Resistant Pseudomonas aeruginosa Isolates from Burn Patients During ۲۰۲۱-۲۰۲۲ | ندا پیربنیه | **Neda pirbonyeh** |
| ۲۳ | ۱۳٦ | Antibacterial Effect of Hydroxypropyl Methylcellulose Gel Containing Bacteriophages Against Pseudomonas aeruginosa Isolated from Burn Patients | ندا پیربنیه | **Neda pirbonyeh** |
| ۲٤ | ۱۳۷ | evaluation the frequency of ExoA, ExoS, ExoU, ExoY and type ۳ secretion system genes in drug-resistant Pseudomonas aeruginosa isolated from burn patients during ۲۰۲۱-۲۰۲۲ | امیر امامی | **Amir Emami** |
| ۲٥ | ۲۹ | Artificial Intelligence and the Application of Antimicrobial Peptides in the Control of Burn-Related Microbial Infections: A Scoping Review | الناز وفاپور | **Elnaz Vafapoor** |
| ۲٦ | ۹٤ | Comparative Effects of Mupirocin and Silver Nanoparticle Ointment versus Arnebia | | **Setad abolfazl** |

| | | | | |
|---|---|---|---|---|
| | | Euchroma Ointment on Inflammatory Markers (IL-۱β, IL-۱۰) and Wound Healing Outcomes in Surgical and Burn Wounds in Rats. | سیده ابواالفضل طباطبایی | **Tabatabaei** |
| ۲۷ | ۱۸۵ | Assessment of Awareness, Attitude,and Performance of Nurses in Preventing Hospital-Acquired Infections in the Burn Unit of Golestan University of Medical Sciences Educational Treatment Center in Gorgan in the Year ۲۰۲۵ | آذین رجایی | **Azin Rajaei** |
| ۲۸ | ۱٦۷ | In Vitro Antifungal Activity of Aqueous and Ethanolic Extracts of Calendula officinalis Against Fungal Pathogens Isolated from Burn Wound Infections | دانیال اشجاری | **Danial Ashjari** |
| ۲۹ | ٤٤ | Patterns of Hospital-Acquired Infections and Environmental Bacterial Contamination in a Burn Referral Center in Northern Iran: A Five-Year Surveillance Study | مهسا صادقی | **Mahsa Sadeghi** |
| ۳۰ | ۱۷۰ | Prevalence of Fungal Infections in Burn ICU Patients in Mashhad in ۱٤۰۳ | سید جواد پور افضلی فیروزآبادی | **SeyedJavad Purafzalifiruzabadi** |
| ۳۱ | ۱٥٤ | Artificial Intelligence in Advanced Burn Care: Infection Prediction and Personalized Pain Management | محیا عظیمی | **Mahya Azimi** |
| ۳۲ | ۱۳٤ | Antibacterial, anti-biofilm and anti-efflux pump activity of Green Synthesized capparis spinosa Silver Nanoparticles (Gcs-AgNPs) against Pseudomonas aeruginosa and Acinetobacter baumannii | ندا پیربنیه | **Neda pirbonyeh** |
| ۳۳ | ۷۱ | The Post-Antibiotic Era in Burn Medicine: Innovations in Infection Control and Therapeutic Alternatives | محمد صادق دماوندی | **Mohammadsadegh Damavandi** |
| ۳٤ | ۱۷۲ | Bacterial Infection Patterns in Burn ICU Patients in Mashhad in ۱٤۰۳ | سید جواد پور افضلی فیروزآبادی | **SeyedJavad Purafzalifiruzabadi** |

| | | | | |
|---|---|---|---|---|
| ٣٥ | ٥٦ | Comparison of graft edge scar scores and related indicators in the use of simple continuous suture and stapler in the burn surgery area | علی رشیدپور | **Ali Rashidpour** |
| ٣٦ | ١٢١ | Investigation of the Frequency and Related Factors on the Amount of Transfusion in Patients with Severe Burns: A Retrospective Cross-Sectional Study | محمد طلوعی | **Mohammad Toloei** |
| ٣٧ | ٩٣ | Prevention and Treatment of Burn Scars Using the First Iran-Approved PRP Gel-Based Kit: A Clinical Evaluation | آرش مهوشی | **Arash Mahvashi** |
| ٣٨ | ٥٠ | A Review of the Nurse's Role in the Prevention and Management of Post-Burn Scars: From Theory to Practice | سمیه خزرلو | **Somayeh Khezerloo** |
| ٣٩ | ٦١ | Evaluating the Evidence on Post-Burn Scar Prevention and Treatment: A Critical Review of Strengths, Gaps, and Future Directions | هانیه عزیز | **Hanieh Aziz** |
| ٤٠ | ٢٣ | The Effect of Botulinum Toxin Type A on Hypertrophic Scars Following Burns: A Systematic Review | مینا قربانی | **Mina Gharibi** |
| ٤١ | ٦٣ | Smart Wound Monitoring Sensors for Early Detection of Infection in Burn Patients: A Systematic Review | اصغر احتشامی | **Asghar Ehteshami** |
| ٤٢ | ١٣ | Application of Big Data and Artificial Intelligence: A New Paradigm in Comprehensive Burn Care | علیرضا سیفی اردلی | **Alireza SeyfiArdali** |
| ٤٣ | ١٠١ | Utilizing Explainable Artificial Intelligence (XAI) for Early Detection of Infection in Burn Wounds: A Systematic Review | مهدی جودی | **Mahdi Joudi** |

| | | | | |
|---|---|---|---|---|
| ٤٤ | ١٦٠ | Emerging Technologies in Burn Rehabilitation: Applications of Virtual Reality, Robotics, and ٣D Printing | فرشید طباطبایی | **Farshid Tabatabaei** |
| ٤٥ | ١١٩ | From Image Analysis to Prognosis: How AI is Transforming Burn Wound Assessment – A Narrative Review | ملیکا حسینی | **Melika Hosseini** |
| ٤٦ | ٦٤ | Machine Learning-Based Personalized Rehabilitation Programs for Burn Patients | اصغر احتشامی | **Asghar Ehteshami** |
| ٤٧ | ٦٦ | Evaluating the Effectiveness of Modern Machine Learning and Artificial Intelligence Technologies in Enhancing Rehabilitation Efficiency for Children with Acute Burns: A Systematic Review | امیر حسینی شادفر | **Amir Hossein Shadfar** |
| ٤٨ | ١٢٦ | Integrating Artificial Intelligence to Empower Nursing Students in Burn Wound Management and Clinical Practice | علی علیزاده | **Ali Alizadeh** |
| ٤٩ | ١٤٢ | Application of Deep Learning in Predicting Severe Burn Complications: A Systematic Review | صادق جمشیدیان | **Sadegh Jamshidian** |
| ٥٠ | ٨٤ | AI enhances burn care by improving diagnosis, treatment, and rehabilitation, yielding better physical, psychological, and social outcomes, though limited in scope, requiring further research and ethical frameworks. | مبین شمس | **Mobin Shams** |
| ٥١ | ٥٢ | Application of Artificial Intelligence in the Rehabilitation of Burn Patients: A Systematic Review | هانیه عزیز | **Hanieh Aziz** |
| ٥٢ | ٨١ | Innovative Applications of Artificial Intelligence in Burn Care: A Comprehensive Systematic Review and Meta-Analysis | امیر قنبرپور جویباری | **Amin Ghanbarpour Jouybari**١ |

| | | | | |
|---|---|---|---|---|
| ٥٣ | ٢٢ | Review Article: The Application of Artificial Intelligence in Burn Prevention | پریسا یوسفی کنجدر | **Parisa Yousefinjdar** |
| ٥٤ | ٦٢ | AI-Based Early Warning Systems for Burn Incidents: A Systematic Review of Applications in Industrial and Residential Settings | اصغر احتشامی | **Asghar Ehteshami** |
| ٥٥ | ٤٨ | Digital Transformation in Burn Management: From Prediction to Follow-up Using Artificial Intelligence and Big Data Analytics | سمیه خزرلو | **Somayeh Khezerloo** |
| ٥٦ | ٥٨ | The Application of Artificial Intelligence and Big Data in the Critical-Phase Management of Burn Patients: A Narrative Review | مصطفی قاسم پور | **Mostafa Ghasempour** |
| ٥٧ | ١٨٦ | A review of the use of intelligent psychological chatbots in anxiety and depression caused by burns | مهناز عباسی لال آبادی | **Mahnaz AbbasiLalAbadi** |
| ٥٨ | ٧٤ | Application of artificial intelligence in the rehabilitation of burn patients and identification of related opportunities and challenges | سیده سمیه حسینی | **Seyedeh Somayeh Hoseini** |
| ٥٩ | ٥٩ | Application of Artificial Intelligence in Burn Diagnosis and Treatment: A Systematic Review | محمد خواجه گودری | **Mohammad Khjehgoodari** |
| ٦٠ | ١٧٣ | "Application of Artificial Intelligence in Clinical Burn Education: A Narrative Review " | فاطمه دالوند | **Fatemeh DALVAND** |
| ٦١ | ١٨١ | A Mathematical Model for Predicting the change of Direction in Z-plasty with Trigonometric Relativities | علی احمد آبادی | **Ali Ahmdabadi** |

| | | | | |
|---|---|---|---|---|
| ٦٢ | ٩٠ | Factors affecting the survival of burn patients with an artificial intelligence approach | نجیبه محسنی معلم کلائی | **Najibeh Mohseni moalemkolae** |
| ٦٣ | ١٨٣ | Harnessing Stromal Vascular Fraction in the Management of Post-Burn Musculoskeletal Dysfunction | مسیحا مبین | **Masiha Mibayen** |
| ٦٤ | ٩٦ | the Effect of Mesenchymal Stem Cell Therapy on The Treatment of Burn Wounds: A Review Article | شقایق رضایی کیا | **Shaghayegh Rezaee Kia** |
| ٦٥ | ٣٦ | Limbal stem Cell Therapy for Ocular Burns;Advances,Challenges,and Clinical Implications:A Comprehensive Review | نرجس بهرامی | **Narjes Bahrami** |
| ٦٦ | ١٤ | Recent Advances in Nursing Care for Burn Emergencies: From Triage to Stabilization | علیرضا سیفی اردلی | **Alireza SeyfiArdali** |
| ٦٧ | ٤٢ | Standardized Checklists for Primary Prehospital Emergency Care in Severe Burn Injuries: A Systematic Review of Design and Validation Studies | علی رازی | **Ali Razi** |
| ٦٨ | ١٧٧ | Investigation of the causes of limb amputations and their relationship with the type of burn in Shahid Motahari Educational and Medical Center, Tehran, in ٢٠٢٣-٢٠٢٤ | مهدیه پور صادقی | **Mahdiye Poursadeghi** |
| ٦٩ | ٦٨ | Investigating the Relationship Between Gender and Burn Outcomes in Adult Patients Admitted to a Burn Center in Northern Iran | زهرا رادفر | **Zahra Radfar** |
| ٧٠ | ١٦٦ | Study of demographic, clinical and outcome characteristics of burn patients referred | | **Mohammagjavad** |

| | | | | |
|---|---|---|---|---|
| | | to Choromi Burn Hospital, Genaveh, Bushehr | محمد جواد طاهری | **Taheri** |
| ٧١ | ١٦٤ | The Impact of a Workshop-Based Burn Wound Care Education Program for Children Utilizing the Kirkpatrick Model on Nurses' Knowledge and Performance: A Randomized Clinical Trial | فاطمه محمدیان | **Fateme Mohammadian** |
| ٧٢ | ١٣٩ | Factors Influencing Hospitalization Duration and Mortality in Burn Patients: A ٢-Year Analysis of Causes, Age, and Total Body Surface Area | علی قهرمانی آرخلو | **Ali Qahremani Arekhloo** |
| ٧٣ | ١٠٩ | "Burns Due to Traditional Medicine Interventions: The Deadly Chain of Blistering, Infection, and Sepsis in a Diabetic Patient from Underserved Areas | آذین رجایی | **Azin Rajaei** |
| ٧٤ | ٨٧ | Effect of silk protein spray in emergency management of acute burn wounds: A review study | معصومه رفعتی | **Masome Rafat** |
| ٧٥ | ٣٩ | A Narrative Review on the Effect of Virtual Reality on Pain Management in Pediatric Burn Patients | زهرا یوسفی | **Zahra Yousefi** |
| ٧٦ | ١٦٢ | Impact of Acute In-Hospital Post-Burn Pruritus on Quality of Life: A Cross-Sectional Study | رامیار فرزان | **Ramyar Farzan** |
| ٧٧ | ٢٤ | Management of Hypothermia in Burn Patients in the Operating Room | رقیه رحمانیان | **Roghaye Rahmanian** |
| ٧٨ | ٢٦ | Integrated Approaches to Pain and Pruritus Management in Burn Patients: A Comprehensive Review of Pharmacological and Non-Pharmacological Interventions | فریاد احمد زاده | **Faryad Ahmadzadeh** |
| ٧٩ | ١١٨ | A Narrative Review of Nursing Interventions for Pain Management in Burn Patients | | **Zahra Kafshgar** |

| | | | | |
|---|---|---|---|---|
| | | | زهرا کفش گر | |
| ۸۰ | ٤۹ | Novel Approaches in the Management of Pain and Pruritus in Burn Patients: Enhancing Quality of Life and Improving the Treatment Process | سمیه خزرلو | **Somayeh Khezerloo** |
| ۸۱ | ۱۰٤ | Evaluation the relationship between itching and pain caused by burns on the mental health of burn patients in a burn care hospital | زهرا فلاحتی | **Zahra Falahati** |
| ۸۲ | ۳٤ | Investigating the prevalence of post-traumatic stress disorder (PTSD) symptoms in patients with burns caused by fires in Ali Ibn Abi Taleb (AS) Hospital in Zahedan | محمد مهدی افروزه | **Mohammadmahdi Afroozeh** |
| ۸۳ | ۹۹ | Effects of an Occupation-Based Intervention on Hand and Upper Extremity Function, Daily Activities, and Quality of Life in People With Burn Injuries: A Randomized Controlled Trial | مهنوش خانی پور | **Mahnoosh Khanipour** |
| ۸٤ | ۱٥٦ | The Impact of Sleep Disorders on the Recovery of Burn Patients and the Role of Nursing Care in Their Management | محیا عظیمی | **Mahya Azimi** |
| ۸٥ | ۱۰۰ | The investigation of the effects of occupation- based intervention on anxiety, depression, and sleep quality of subjects with hand and upper extremity burns: A randomized clinical trial | مهنوش خانی پور | **Mahnoosh Khanipour** |
| ۸٦ | ۹۸ | Lived experiences of mothers caring for children with burn-induced disabilities | فاطمه دلفانی | **Fatemeh Delfani** |
| ۸۷ | ۱٤۷ | Social Determinants of Burn Injuries: A Narrative Review | حسین افشار پویا | **Hossein Afsharpouya** |
| ۸۸ | ۳۸ | Post-Traumatic Growth Among Adult Burn Survivors: A Review of Psychological | | **RABEE RAHIMI** |

| | | | | |
|---|---|---|---|---|
| | | Outcomes and Rehabilitation | ربیع رحیمی | |
| ۸۹ | ۱۹ | The rate of burnout, depression, and anxiety among burn care team members in a tertiary burn hospital: A descriptive cross-sectional study | پرویز نمازی | **Parviz Namazi** |
| ۹۰ | ۷۵ | Legal Dimensions of Burn Injuries: A Systematic Review of Compensation, Liability, and Policy Frameworks | امیر رضا صفر خانلو | **Amirreza Safarkhanlou** |
| ۹۱ | ۱۲۹ | Epidemiological study of burns in children under ۷ years of age admitted to Amir al-Momenin Burn and Trauma Hospital | علی اکبر محمدی | **علی اکبر محمدی** |
